Let's Start!

Let's review!

Learning Outcome

Describe the reasons or results of events or actions in spoken or written texts, in work and social contexts.

Ask your partner:

- Which team roles do you think you are a good fit for? Why?
- What does it take to succeed in a team?

Can Do Statements

- I can discuss reasons for and results of an event or action related to work and jobs.
- I can talk or report about things, actions, events, or people in a work environment.
- I can talk about team roles.

Let's Explore!

How do you avoid **stepping on someone's toes***?

* To "step on someone's toes" means to offend someone, especially by becoming involved in something that they are responsible for.

Instructions: Read the text aloud.

Different teams have different purposes, so it is believed that some team roles may not be required when setting one up. The absence of a particular role is not always a potential problem. If a team has specific parameters to work within for the creation of a new ad campaign, it is supposed that including a Plant on the team would be counterproductive, in that they may want to come up with something new altogether and not work within the constraints.

Since there may be times in a project where a missing role becomes necessary, it is worth thinking about how to fill that gap. Can someone currently on the team take on the role or should additional staff be brought in to provide a particular contribution?

There may be overlaps or gaps in team roles because most people will fit into more than one role. It is recommended that teams pay careful attention to how many people in each role are on the team. A lot of Plants on a team may result in too many ideas competing for attention and a large number of Shapers can cause aggressive behavior within the group.

Too many Specialists may cause territorial behavior, and Completer Finishers may step on each other's toes, competing for the final "sign-off" on the work. All team roles can be grouped into thinking, social, and action-oriented. As the purpose of each team will be different, the three areas will be represented in different numbers on each team. It is understood that there are times when social roles may not be as necessary as thinking and action roles, and vice versa. It can be concluded there is no right or wrong way to form a team.

Let's Practice!

What reasons were mentioned?

Instructions: Read the sentences. Circle all the linking words or structures used to introduce a reason. Read the sentences aloud. Check your pronunciation with your instructor.

1. A large number of Plants in a team may be a problem for there may be too many ideas competing for attention.
2. Since there may be times in a project where a missing role becomes necessary, it is worth thinking about how to fill the gap.
3. Including a Plant on a team may be counterproductive, in that they may want to come up with something new altogether.
4. There may be overlaps and gaps in team roles because most people will fit into more than one role.
5. Completer Finishers may step on each other's toes, competing for the final "sign-off" on the work.

Let's Practice!

What were some of the important words used in the article?

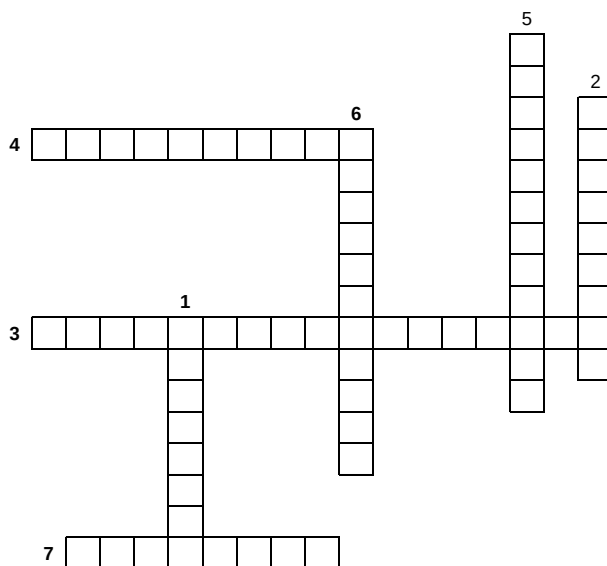

Instructions: Read the clues to correctly complete the crossword.

Down

1. The position that someone has in a group to work together in a particular job.
2. A set of fixed limits that control the way that something should have been done.
5. Something that you give or do to help someone to be successful.
6. Careful to guard something that you consider your own and prevent others from using it.

Across

3. Having an effect that is opposite to the one that is intended or wanted.
4. Something that limits your freedom to do what you want.
7. Interested in a particular thing or activity.

Extension Activity

Determine your team role.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Read through the nine different team roles as described by Belbin.
- Select which one suits you.
- Write a short report about the role. Include examples that show how you possess the characteristics of that skill.
- Read your report aloud to your class.

Self-Assessment

Yes

No

I identify Belbin's team roles.

☐ ☐

I identify the role which fits me.

☐ ☐

I write and provide evidence to support my opinion.

☐ ☐

Target Words

- **team role** (noun): the position that someone has in a group of people chosen to work together to do a particular job
e.g. It is believed that some team roles may not be required.
- **parameter** (noun): a set of fixed limits that control the way that something should be done
e.g. A team has specific parameters to work within for the creation of a new ad campaign.
- **counterproductive** (adjective): having an effect that is opposite to the one intended or wanted
e.g. Including a Plant on the team would be counterproductive.
- **constraint** (noun): a thing which hinders your freedom to do something
e.g. They may want to come up with something new altogether and not work within the constraints.
- **contribution** (noun): something that you give or do in order to help something be successful
e.g. He made a huge contribution to the team.
- **territorial** (adjective): careful to guard what you consider to be your own, and prevent others from using it
e.g. Business vendors are very territorial about their areas of town.
- **oriented** (adjective): interested in a particular thing or activity
e.g. All team roles can be grouped into thinking, social and action-oriented roles.

Learning Points

Reason Clauses

Let's review the different ways you can introduce reasons in sentences.

Look at the chart for a summary of the different linking words or structures you can use to introduce a reason.

Word/Phrase	Meaning/Use	Example
because	answers the question Why?	<i>You will be getting a lot of e-mails because of the deadline.</i>
Since /As	to introduce reasons that the listener or reader are already aware of.	<i>Since you're new here, I can show you around the office. As you've already been introduced to everyone, we can begin the meeting.</i>
in that insofar as inasmuch as	to explain what was just said. Used to express <i>because of</i> , <i>due to</i> , <i>owing to</i> , or <i>before</i> in very formal or literary contexts only.	<i>He's quite difficult to work with, in that/insofar as/inasmuch as he is always complaining about the job.</i>
for	used in very formal situations and in academic writing.	<i>I was very nervous for it was my first day.</i>
-ing clauses	to express the relationship between two or more reasons.	<i>We lined up for hours, hoping to get his autograph!</i>

Examples:

- *Since there may be times in a project where a missing role becomes necessary, it is worth thinking about how to fill that gap.*
- *Including a Plant on the team would be counterproductive, in that they may want to come up with something new altogether and not work within the constraints.*
- *Completer Finishers may step on each other's toes, competing for the final "sign-off" on their work.*
- *There may be overlap or gaps in team roles because most people will fit into more than one role.*

Learning Points

Report Verbs with Impersonal Passive Constructions

You can use the structure: *It + passive report verb + finite clause* (a clause which can stand alone) to report information.

For example:

It is thought that the Pyramids took 25 years to build.

This pattern is often used in formal reports, news reports and academic writing.

You can use that structure with the following verbs:

allege	intend	report
announce	know	reveal
believe	mention	say
claim	notice	see
consider	object	show
declare	observe	state
explain	promise	suggest
feel	prove	think
find	recommend	understand

Examples:

- *It is **believed** that some team roles may not be required.*
- *It is **supposed** that including a Plant on the team would be counterproductive.*
- *It is **shown** that they may want to come up with something new altogether.*
- *It is **recommended** that teams pay careful attention to how many of each role are on the team.*
- *It is **understood** that there are times when social roles may not be as necessary as thinking and action roles.*
